Day 15: Equal fractions with no drawing

Name _____ Date _____

I can make equal fractions with no drawing, hundredths too.

Warm-up.

1. 6 × 10 = ? _____	2. 10 × 10 = ? _____
3. 7 × 5 = ? _____	4. 9 × 6 = ? _____

Example 1. One tenth is cut into 10 equal parts. $\frac{3}{10}$ = __/100.

3/10 = (____ × 3)/(____ × 10) = ____/100

Each tenth was cut into ____, so I multiply both numbers by ____.

Example 2. No drawing. $\frac{9}{2}$ = 27/__.

27 = ____ × 9, so each half was cut into ____. 9/2 = (____ × 9)/(____ × 2) = ____/____

Fix it. Each answer is wrong. Say what went wrong. Then do it right.

5. Kim says: "$\frac{50}{100}$ is far more than $\frac{1}{2}$, because 50 and 100 are much bigger than 1 and 2."

   What went wrong: _____

6. Nia says: "I cut one tenth into 10 equal parts, so $\frac{1}{10}$ = $\frac{1}{100}$."

   What went wrong: _____

Missing numbers. Fill in each blank. Check after each set. Tick each one right the first time.

Set			
Set 1	$\frac{7}{5}$ = __/10	$\frac{11}{6}$ = __/12	$\frac{9}{4}$ = 18/__
Set 2	$\frac{16}{10}$ = __/5	$\frac{14}{6}$ = __/3	$\frac{30}{12}$ = 5/__
Set 3	$\frac{13}{10}$ = __/100	$\frac{170}{100}$ = __/10	$\frac{19}{10}$ = 190/__
Set 4	$\frac{11}{4}$ = __/12	$\frac{18}{10}$ = 9/__	$\frac{230}{100}$ = __/10

I grouped the parts by ____, so I divide both numbers by ____.

Right first tries: ____ of 12

Names for one fraction.

Names for $\frac{7}{2}$: $\frac{7}{2}$ = __/4 = __/6 = __/8 = __/10 = __/12 = __/100

What repeats? _____

Challenge. Write $\frac{11}{5}$ in hundredths. Each fifth was cut into how many parts?

_____
