Day 18: Closer to 1

Name _____ Date _____

I can use 1 to compare, and tell which fraction is closer to 1.

Warm-up. $\frac{7}{3}$ = __/12 _____

My line. Rule a line 6 inches long. Mark 0, 1/2, 1 and 2.

Example 1. Mark $\frac{5}{6}$ and $\frac{6}{5}$ on the line from 0 to 2. Write >, = or <: $\frac{5}{6}$ __ $\frac{6}{5}$.

____ is less than 1. ____ is more than 1. So ____ < ____.

Each side of 1. Write >, = or <.

1. $\frac{7}{5}$ __ $\frac{9}{12}$	2. $\frac{6}{8}$ __ $\frac{5}{3}$	3. $\frac{8}{8}$ __ $\frac{10}{10}$	4. $\frac{9}{5}$ __ $\frac{9}{12}$

Example 2. $\frac{4}{5}$ and $\frac{5}{6}$ are each one part short of 1. Which is closer to 1? Write $\frac{4}{5}$ __ $\frac{5}{6}$.

____ is missing 1/__. ____ is missing 1/__. A ____ is smaller. So ____ < ____.

Curio Class, grade 4 math, day 18, version draft 1, not ready, not yet taught, CC BY 4.0, curioclass.org

Fix it. Each answer is wrong. Say what went wrong. Then do it right.

1. Rio says $\frac{5}{6} = \frac{7}{8}$, because each is one part short of 1.

   What went wrong: _____

2. Ivy says $\frac{2}{3}$ is more than $\frac{5}{6}$, because thirds are bigger pieces.

   What went wrong: _____

One part short. Write the sign. What is each one missing?

3. $\frac{3}{4}$ ___ $\frac{2}{3}$. Each is one part short of 1.

   Missing: _____ and _____

4. $\frac{1}{2}$ ___ $\frac{99}{100}$. Each is one part short of 1.

   Missing: _____ and _____

Dee's claim. Dee says $\frac{3}{4}$ and $\frac{5}{6}$ are the same distance from 1, because each is one part short. Is Dee right? Mark both on the line and explain.

Challenge. $\frac{5}{4}$ and $\frac{13}{12}$ are each one part more than 1. Which is closer to 1? Write $\frac{5}{4}$ ___ $\frac{13}{12}$. _____
