Day 22: Pick a way, then compare

Name _____ Date _____

I can pick a way, compare, and write it with the right sign.

Warm-up.

1. Fill in the blank: $\frac{5}{6} = _/12$.
2. No line. Use $\frac{1}{2}$ to write >, = or <: $\frac{6}{10}$ ___ $\frac{3}{8}$.

Example. Compare $\frac{3}{5}$ and $\frac{6}{8}$ two ways. Write the sign.

Same size parts: 3/5 = ____ and 6/8 = ____

Same count: 3/5 = ____ and 6/8 = ____

So 3/5 ____ 6/8. Quicker way: _____

Fix it. Rio wrote: "$\frac{2}{5} = \frac{4}{10}$, and $\frac{3}{10}$ is less, so $\frac{3}{10} > \frac{2}{5}$."

What went wrong: _____

Set A. Show the fractions you renamed. Then write >, = or <.

Pair	**The fractions I renamed**
$\frac{7}{10}$ ___ $\frac{4}{5}$	
$\frac{3}{8}$ ___ $\frac{3}{10}$	
$\frac{8}{6}$ ___ $\frac{4}{3}$	

Set B.

Pair	The fractions I renamed
$\frac{5}{12}$ ___ $\frac{3}{4}$	
$\frac{3}{10}$ ___ $\frac{25}{100}$	
$\frac{7}{6}$ ___ $\frac{5}{4}$	

Set C.

Pair	The fractions I renamed
$\frac{3}{6}$ ___ $\frac{3}{4}$	
$\frac{5}{8}$ ___ $\frac{7}{12}$	
$\frac{9}{12}$ ___ $\frac{6}{8}$	
$\frac{7}{8}$ ___ $\frac{9}{10}$	

Two ways. Compare $\frac{1}{4}$ and $\frac{2}{10}$ two ways. Write the sign. Which way was quicker, and why?

Challenge. Find a fraction in twelfths between $\frac{2}{3}$ and $\frac{5}{6}$. Prove it.
