Day 23: Pick a way and prove it

Name _____ Date _____

I can pick a way to compare, and prove my answer.

Example. Compare $\frac{2}{10}$ and $\frac{3}{4}$ three ways: with $\frac{1}{2}$, with the same parts, and with the same count.

With 1/2: ___ is under 1/2 and ___ is over, so ___ < ___.

Same parts: ___ = ___ and ___ = ___, so ___ < ___.

Same count: ___ = ___ and ___ = ___, so ___ < ___.

Cards. Say the sign and your way first. Then prove it. Is it a trap? Write "cannot tell" and why.

Card	**Sign, way and proof**
$\frac{5}{10}$ ___ $\frac{7}{12}$	
$\frac{2}{8}$ ___ $\frac{3}{12}$	
Jay read $\frac{1}{2}$ of a short book. Kim read $\frac{1}{3}$ of a long book. Who read more pages?	
$\frac{8}{12}$ ___ $\frac{4}{5}$	
$\frac{9}{8}$ ___ $\frac{5}{4}$	
$\frac{6}{8}$ ___ $\frac{8}{10}$	

Curio Class, grade 4 math, day 23, version draft 1, not ready, not yet taught, CC BY 4.0, curioclass.org

More cards.

Card	Sign, way and proof
Mo drank $\frac{4}{8}$ of a small carton of milk. Lu drank $\frac{1}{6}$ of a big carton. Who drank more milk?	
$\frac{1}{5}$ — $\frac{2}{12}$	

Stories. Show or tell how you know.

1. Ivy's ribbon is $\frac{13}{10}$ meters long. Max's ribbon is $\frac{5}{3}$ meters long. Whose ribbon is longer? Write the comparison with >, = or <.

2. Noor ate $\frac{4}{6}$ of a small sandwich. Sam ate $\frac{3}{5}$ of a big sandwich. Noor says, "I ate more, because $\frac{4}{6} > \frac{3}{5}$." Can she be sure? Tell why.

Prove it. Which is greater, $\frac{5}{6}$ or $\frac{9}{10}$? Prove it two ways. One way may be a number line.
