Day 24: Show what I know

Name _____ Date _____

I can show what I know and fix what I missed.

Work alone. Show your work.

1. A number line from 0 to 2 is marked in thirds, with a point at $\frac{4}{3}$. "Draw marks to cut each third into 2 equal parts. Write the new name for the point: $\frac{4}{3}$ = __/__."

New name: _____

2. Rosa says $\frac{1}{5}$ and $\frac{2}{10}$ are different amounts, because 2 and 10 are bigger than 1 and 5. Is Rosa right? Explain with a drawing.

3. No drawing. "(i) Circle every fraction equal to $\frac{6}{10}$: $\frac{3}{5}$, $\frac{8}{12}$, $\frac{60}{100}$, $\frac{6}{100}$. (ii) Are $\frac{10}{4}$ and $\frac{15}{6}$ the same number? Show how you know."

4. No drawing. "Fill in each blank: $\frac{7}{6}$ = __/12. $\frac{6}{5}$ = 12/__. $\frac{11}{10}$ = __/100."

Blanks: _____ _____ _____

Curio Class, grade 4 math, day 24, version draft 1, not ready, not yet taught, CC BY 4.0, curioclass.org

5. Without renaming both fractions, decide which is greater, $\frac{48}{100}$ or $\frac{3}{5}$. Use $\frac{1}{2}$. Write the comparison with a sign and explain. You may draw a number line.

6. Leo has read $\frac{2}{3}$ of his book. Mai has read $\frac{1}{4}$ of her book. Leo says, 'I have read more pages than you.' Can Leo be sure? Circle yes or no. Finish the sentence: A comparison of two fractions is only true when ___.

Yes No

7. No line given. "Write >, = or <. Show the fractions you renamed. (a) $\frac{5}{6}$ ___ $\frac{7}{10}$ (b) $\frac{3}{10}$ ___ $\frac{1}{3}$ (c) $\frac{2}{6}$ ___ $\frac{4}{12}$"

(a) _____ (b) _____ (c) _____
