Day 25: A fraction as a sum of pieces

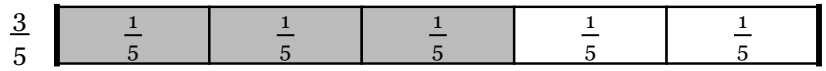

Name _____ Date _____

I can write a fraction as a sum of unit fractions, past 1 too.

Warm-up. Count by halves from $\frac{1}{2}$ to $\frac{8}{2}$. Write the counts that are whole numbers.

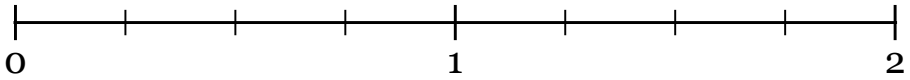

Whole numbers: _____

Example 1. Lay fifth-pieces in a row to make $\frac{3}{5}$. Write $\frac{3}{5}$ as a sum of unit fractions.

1/5 + ____ + ____ = ____ 3/5 is ____ pieces of size ____.

Example 2. Lay fourth-pieces along a line from 0 to 2. Stop at $\frac{7}{4}$. Write $\frac{7}{4}$ as a sum of unit fractions.

_____ = 7/4

7/4 is more / less than 1, because _____

Board paths. Ren lays boards end to end. Lay one piece for each board.

1. Path 1 is $\frac{4}{6}$ meter long. Each board is $\frac{1}{6}$ meter. Write the path as a sum of boards. Is it more or less than 1 meter?

   Sum: _____ More / less, because _____

2. Path 2 is $\frac{5}{3}$ meters long. Each board is $\frac{1}{3}$ meter. Write the path as a sum of boards. Is it more or less than 1 meter?

   Sum: _____ More / less, because _____

Board paths.

3. Path 3 is $\frac{7}{6}$ meters long. Each board is $\frac{1}{6}$ meter. Write the path as a sum of boards. Is it more or less than 1 meter?

   Sum: _____ More / less, because _____

Fix it. Each answer is wrong. Say what went wrong. Then do it right.

4. Bo laid 4 tenth-pieces in a row. He wrote $\frac{1}{10} + \frac{1}{10} + \frac{1}{10} + \frac{1}{10} = \frac{4}{40}$.

   What went wrong: _____

   Right: _____

5. Ada counted third-pieces: $\frac{1}{3}$, $\frac{2}{3}$, $\frac{3}{3}$. She says there is no $\frac{4}{3}$, because $\frac{3}{3}$ is all of it.

   What went wrong: _____

   Right: _____

Challenge. Ren also has long boards. Each is $\frac{3}{6}$ meter. Make a $\frac{7}{6}$ meter path with long and short boards. Write the sum.

_____
