Day 26: One amount, more than one way

Name _____ Date _____

I can take a fraction apart in more than one way and write each way.

Warm-up. Find each: 9 + 6, 14 − 8, 8 + 6, 16 − 9, 4 + 9, 11 − 3

Example 1. Make $\frac{5}{6}$ with sixth-pieces. Group the pieces two different ways. Write an equation for each way.

Way 1: 5/6 = ____ + ____ and Way 2: 5/6 = ____ + ____ + ____

Building rounds. Lay one piece for each scoop. Write the sum. Then ring the pieces a new way.

1. Building: milk, $\frac{3}{4}$ cup, with the $\frac{1}{4}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____ Second way: _____

2. Building: cornmeal, $\frac{2}{3}$ cup, with the $\frac{1}{3}$ cup scoop. Write it as a sum of unit fractions.

   Sum: _____

3. Building: butter, $\frac{3}{8}$ cup, with the $\frac{1}{8}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____ Second way: _____

   Both ways are the same amount because

   _____

4. Building: sugar, $\frac{6}{8}$ cup, with the $\frac{1}{8}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____ Second way: _____

Fix it. The answer is wrong. Say what went wrong. Then do it right.

5. Kai wrote $\frac{5}{8}$ two ways: $\frac{2}{8} + \frac{3}{8} = \frac{5}{8}$ and $\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$.

   What went wrong: _____

   A second way: 5/8 = _____

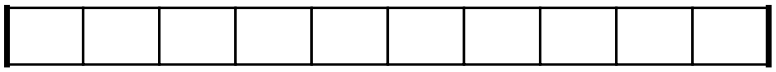

Three ways.

6. Make $\frac{6}{10}$ with tenth-pieces on line 4. Write it three different ways. Shade the strip and ring one way.

   Way 1: 6/10 = ____ + ____

   Way 2: 6/10 = ____ + ____

   Way 3: 6/10 = ____ + ____ + ____

7. Make $\frac{9}{12}$ with twelfth-pieces on line 5. Write it with four parts, then three, then two.

   Four parts: 9/12 = ____ + ____ + ____ + ____

   Three parts: 9/12 = ____ + ____ + ____

   Two parts: 9/12 = ____ + ____

Challenge. Find every way to write $\frac{7}{10}$ as a sum of two tenths. Then find every way with three. How do you know you have them all?

_____

_____
