Day 75: Ungroup more than once, then check by adding

Name _____ Date _____

I can ungroup more than once, in numbers up to six digits, and check by adding.

Estimate. Line up the ones. Can I take it? If not, ungroup. Add back to check.

Example. 52,413 – 17,256

Estimate: _____ – _____ = _____

	Ten thousands	**Thousands**	**Hundreds**	**Tens**	**Ones**
	5	2	4	1	3
–	1	7	2	5	6

Check: _____ + _____ = _____ Say it: 1 __ is 10 __.

Set 1. Work on your column sheet.

1. 7,834 – 2,569

   Estimate: _____ Difference: _____ Add back: _____

2. 63,152 – 28,497

   Estimate: _____ Difference: _____ Add back: _____

3. 91,736 – 8,358

   Estimate: _____ Difference: _____ Add back: _____

Set 2. Work on grid paper. Write the place names only if you need them.

4. 245,817 − 129,563

   Estimate: _____ Difference: _____ Add back: _____

5. 573,264 − 86,791

   Estimate: _____ Difference: _____ Add back: _____

6. 831,425 − 362,758

   Estimate: _____ Difference: _____ Add back: _____

Fix it. Each answer is wrong. Find the mistake. Then do it right.

7. Ty says: "45,206 − 3,874 = 6,466." Estimate first.

   What went wrong: _____

8. Nia says: "82,415 − 36,278 = 56,137." Add back first.

   What went wrong: _____

Challenge. Find the missing digit: 8?,526 − 34,178 = 50,348. Missing digit: _____
