Day 15: Equal fractions with no drawing

Name _____ Date _____

I can make equal fractions with no drawing, hundredths too.

Warm-up.

1. $5 \times ____ = 10$	2. $4 \times ____ = 8$
3. $10 \times ____ = 100$	4. $6 \times ____ = 12$

Example 1. Each tenth is cut into 10 equal parts. $\frac{3}{10} = ____/100$.

$3/10 = (____ \times 3)/(____ \times 10) = ____/100$

Each tenth was cut into ____, so I multiply both numbers by ____.

Example 2. $\frac{9}{2} = 27/____$.

$27 = ____ \times 9$, so each half was cut into ____. $9/2 = (____ \times 9)/(____ \times 2) = ____/____$

Fix it. Each answer is wrong. Say what went wrong. Then do it right.

5. Kim says: "$\frac{50}{100}$ is far more than $\frac{1}{2}$, because 50 and 100 are much bigger than 1 and 2."

   What went wrong: _____

6. Nia says: "I cut one tenth into 10 equal parts, so $\frac{1}{10} = \frac{1}{100}$."

   What went wrong: _____

Missing numbers. Fill in each blank. Check after each set. Tick each one right the first time.

Set 1	**1.** $\frac{7}{5}$ **= ____/10**	**2.** $\frac{11}{6}$ **= ____/12**	**3.** $\frac{9}{4}$ **= 18/____**
Set 2	4. $\frac{16}{10}$ = ____/5	5. $\frac{14}{6}$ = ____/3	6. $\frac{30}{12}$ = 5/____
Set 3	7. $\frac{13}{10}$ = ____/100	8. $\frac{170}{100}$ = ____/10	9. $\frac{19}{10}$ = 190/____
Set 4	10. $\frac{11}{4}$ = ____/12	11. $\frac{18}{10}$ = 9/____	12. $\frac{230}{100}$ = ____/10

Right first tries: ____ of 12

Names for one fraction.

Names for $\frac{7}{2}$: $\frac{7}{2}$ = ____/4 = ____/6 = ____/8 = ____/10 = ____/12 = ____/100

What repeats? _____

Challenge. Write $\frac{11}{5}$ in hundredths. Each fifth was cut into how many parts?

_____/100. Each fifth was cut into _____ parts.
