Day 19: Rename one, then compare

Name _____ Date _____

I can compare two fractions when one can be renamed in the other's parts.

Warm-up. Write a number that is a multiple of both 3 and 4. ____

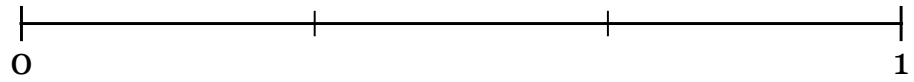

One half. Use $\frac{1}{2}$ to compare. Write >, = or <. $\frac{4}{10}$ __ $\frac{2}{3}$

From grade 3.

1. Circle the larger: $\frac{3}{8}$ or $\frac{5}{8}$.
2. Circle the larger: $\frac{1}{4}$ or $\frac{1}{6}$.

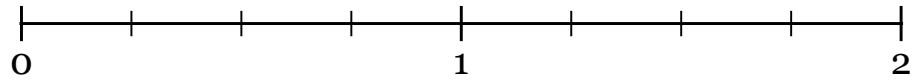

Example 1. Compare $\frac{2}{3}$ and $\frac{7}{12}$. Write >, = or <.

12 = 3 × ____, so cut each third into ____ parts.

2/3 = ____/12, and ____/12 ____ 7/12, so 2/3 ____ 7/12.

Example 2. Compare $\frac{5}{4}$ and $\frac{9}{8}$. Write >, = or <.

8 = 4 × ____, so cut each fourth into ____ parts.

5/4 = ____/8, and ____/8 ____ 9/8, so 5/4 ____ 9/8.

Fix it. Each answer is wrong. Say what went wrong. Then do it right.

1. Rae says: "$\frac{9}{12}$ is more than $\frac{5}{6}$, because 9 and 12 are bigger."

   What went wrong: _____

2. Ivy says: "$\frac{4}{5} = \frac{4}{10}$, so $\frac{4}{5} < \frac{7}{10}$."

   What went wrong: _____

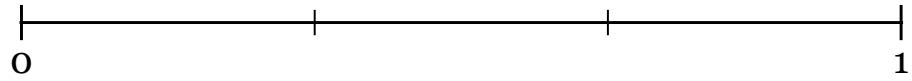

Your turn. Mark the fraction to rename. Cut its parts and rename it. Mark the other. Write the sign.

Pair 1. $\frac{3}{4}$ __ $\frac{7}{8}$

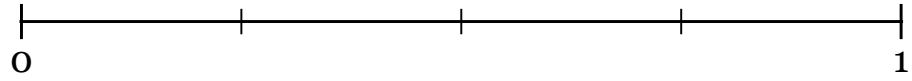

____ = ____, and ____ ____ ____, so _____

Pair 2. $\frac{2}{3}$ __ $\frac{3}{6}$

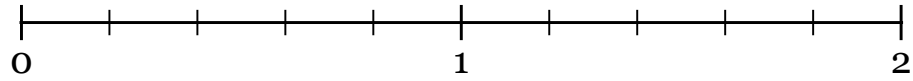

____ = ____, and ____ ____ ____, so _____

Pair 3. $\frac{3}{12}$ __ $\frac{1}{4}$

____ = ____, and ____ ____ ____, so _____

Pair 4. $\frac{13}{10}$ __ $\frac{7}{5}$

____ = ____, and ____ ____ ____, so _____

Challenge. Write a fraction in twelfths that is between $\frac{3}{4}$ and 1. _____
