Day 20: Rename both fractions

Name _____ Date _____

I can rename both fractions when neither denominator fits the other.

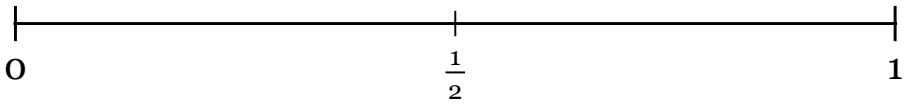

Warm-up.

1. List the multiples of 6 and of 9, up to 40. Circle the numbers in both lists.

   Multiples of 6: _____

   Multiples of 9: _____

2. Use the line. Write >, = or <: $\frac{2}{5}$ __ $\frac{7}{8}$. Is each more or less than $\frac{1}{2}$?

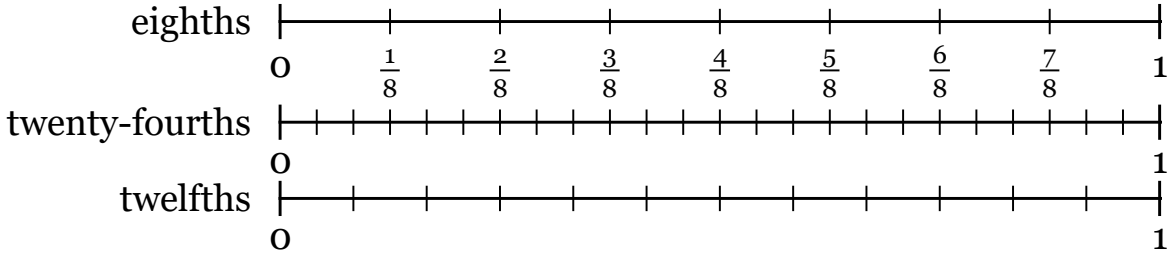

Example 1. Compare $\frac{2}{3}$ and $\frac{4}{5}$. Rename both so the parts are the same size.

Multiples of 3: _____ Multiples of 5: _____ In both: ____

2/3 = ____/15, and 4/5 = ____/15. So 2/3 ____ 4/5.

Example 2. Compare $\frac{5}{8}$ and $\frac{7}{12}$. Rename both so the parts are the same size.

Multiples of 8: _____ Multiples of 12: _____ In both: ____

5/8 = ____/24, and 7/12 = ____/24. So 5/8 ____ 7/12.

Fix it. Ivy's sign is right; her working is wrong. Say why, then do it right.

1. Ivy says: "$\frac{4}{5} = \frac{4}{30}$ and $\frac{5}{6} = \frac{5}{30}$. So $\frac{4}{5} < \frac{5}{6}$."

   What went wrong: _____

On your own. List multiples, rename both, write the sign. Check with 1/2 or 1.

2. Rename both, then write >, = or <: $\frac{5}{8}$ __ $\frac{4}{5}$

   Multiples of __: _____ Multiples of __: _____

   ___/___ = ___/___, and ___/___ = ___/___. So _____. With 1/2 or 1: ___

3. Rename both, then write >, = or <: $\frac{2}{3}$ __ $\frac{3}{10}$

   Multiples of __: _____ Multiples of __: _____

   ___/___ = ___/___, and ___/___ = ___/___. So _____. With 1/2 or 1: ___

4. Rename both, then write >, = or <: $\frac{9}{10}$ __ $\frac{4}{3}$

   Multiples of __: _____ Multiples of __: _____

   ___/___ = ___/___, and ___/___ = ___/___. So _____. With 1/2 or 1: ___

5. Rename both, then write >, = or <: $\frac{5}{4}$ __ $\frac{7}{6}$

   Multiples of __: _____ Multiples of __: _____

   ___/___ = ___/___, and ___/___ = ___/___. So _____. With 1/2 or 1: ___

Challenge. Find three numbers of parts that work for $\frac{3}{8}$ and $\frac{5}{12}$. Use one to compare them.
