Day 21: Same count, different parts

Name _____ Date _____

I can compare by making the numerators the same.

One whole, two ways: tenths on top, twelfths below.

Warm-up.

1. $\frac{5}{6}$ = __/12 _____
2. Mark $\frac{9}{10}$ and $\frac{1}{2}$ on the tenths line. Write >, = or <: $\frac{9}{10}$ __ $\frac{1}{2}$. _____

Example 1. Which is greater, $\frac{1}{10}$ or $\frac{1}{12}$? 1/10 ____ 1/12. The _____ are longer.

Example 2. Compare $\frac{2}{5}$ and $\frac{4}{12}$. Make the numerators the same.

2/5 = ____/____. Both have ____ parts. So 2/5 ____ 4/12.

Example 3. Compare $\frac{1}{3}$ and $\frac{2}{8}$ two ways. Which way is quicker?

Same numerators: 1/3 = ____/6, so 1/3 ____ 2/8.

Same denominators: 1/3 = ____/24 and 2/8 = ____/24.

Quicker: _____

Fix it. The answer is wrong. Say what went wrong. Then do it right.

3. Mia says $\frac{3}{12}$ is more than $\frac{3}{10}$, because 12 is more than 10. Is she right?

   What went wrong: _____

On your own. Make the numerators the same, or the denominators. Write the sign.

1. $\frac{4}{5}$ ___ $\frac{4}{6}$ Sign: ____ Longer parts: _____

   For pair 1, finish: ____ and ____ both have ____ parts. ____ are longer, so ____ ____ ____.

2. $\frac{2}{12}$ ___ $\frac{2}{8}$ Sign: ____ Longer parts: _____

3. $\frac{1}{5}$ ___ $\frac{2}{12}$

   Renamed: _____ Sign: ____

4. $\frac{8}{10}$ ___ $\frac{4}{6}$

   Renamed: _____ Sign: ____

5. $\frac{2}{4}$ ___ $\frac{4}{8}$

   Renamed: _____ Sign: ____

6. $\frac{1}{3}$ ___ $\frac{5}{12}$

   Renamed: _____ Sign: ____ Quicker way: _____

Challenge. Find a fraction with numerator 4. It must be greater than $\frac{2}{5}$ and less than $\frac{1}{2}$. _____
