Day 26: One amount, more than one way

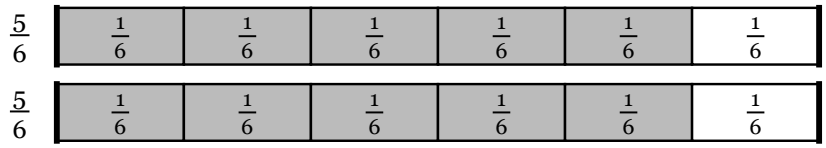

Name _____ Date _____

I can take a fraction apart in more than one way and write each way.

Warm-up. Find each: 9 + 6, 14 − 8, 8 + 6, 16 − 9, 4 + 9, 11 − 3

_____ _____ _____ _____ _____ _____

Example 1. Make $\frac{5}{6}$ with sixth-pieces. Group the pieces two different ways. Write an equation for each way.

Way 1: 5/6 = ____ + ____ and Way 2: 5/6 = ____ + ____ + ____

Building rounds. One piece a scoop; write the sum. Then say you had a bigger scoop: ring a new way.

1. Building: milk, $\frac{3}{4}$ cup, with the $\frac{1}{4}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____

   Second way: _____

2. Building: cornmeal, $\frac{2}{3}$ cup, with the $\frac{1}{3}$ cup scoop. Write it as a sum of unit fractions.

   Sum: _____

3. Building: butter, $\frac{3}{8}$ cup, with the $\frac{1}{8}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____

   Second way: _____

   Both ways are the same amount because _____

4. Building: sugar, $\frac{6}{8}$ cup, with the $\frac{1}{8}$ cup scoop. Write it as a sum of unit fractions, then a second way.

   Sum: _____

   Second way: _____

Fix it. Kai's claim is wrong. Say why. Then write a real second way.

5. Kai says these are two different ways to make $\frac{5}{8}$: $\frac{2}{8} + \frac{3}{8} = \frac{5}{8}$ and $\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$.

   Why: _____

   A second way: 5/8 = _____

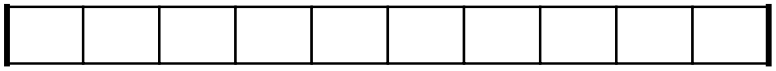

Three ways.

6. Make $\frac{6}{10}$ with tenth-pieces. Write it three ways. Shade the strip and ring one way.

   Way 1: 6/10 = ____ + ____

   Way 2: 6/10 = ____ + ____

   Way 3: 6/10 = ____ + ____ + ____

7. Make $\frac{9}{12}$ with twelfth-pieces. Write it in four parts, then three, then two.

   Four parts: 9/12 = ____ + ____ + ____ + ____

   Three parts: 9/12 = ____ + ____ + ____

   Two parts: 9/12 = ____ + ____

Challenge. Find every way to write $\frac{7}{10}$ as a sum of two tenths. Then find every way with three. How do you know you have them all?

_____

_____
