Unit 11.1 record sheet: area and perimeter formulas

One row a student. Each cell gets a tick, or the error letter of the wrong answer (A to E, from the unit opener). R1 to R4: the readiness check, day 88. E89 to E92: the exits; on day 90 a tick means both parts, by either path. End 1 to 7: the end check, day 93; items 5 and 6 get one tick for each look-for (item 5: the length, the right measure for each part, the units; item 6: two sides that add to the same, a reason from length plus width). A column with more than a third letters is the next day's opening.

Student	R1	R2	R3	R4	E89	E90	E91	E92	End 1	End 2	End 3	End 4	End 5			End 6		End 7
